In case anyone doesn't know; The **QAngio** metric most similar to the **Cleerly** "Total Calcified Plaque Volume" in the data for the LMHR study. The attached regression of Qangio vs. Tcpv0 (0=first visit or baseline) and the accompyng log-log chart demonstrate the exponential component of all plaque metrics, log-log p-score being much better than the non transformed values.

- - QAngio1 vs Tcpv0 -- Qangio
